CVX 160 Features & Benefits

Installation without Screws and Tools

The fixing supports have been designed to be mounted without screws thanks to pre-punched holes on the mounting rails. Moreover the innovative support allows the fixing of the din rails on the brackets and their adjustment in depth, without using any tools.

Quick Installation of the Insulating Panels

The front panels in plastic material allow for quick installation by means of two ¼ turn locks. Earthing connection is not necessary. The whole range can be used with a kit for installation of hinges on the front panels.

Strength and Design

The fine design and the special curved glass of the door allow the installation of the distribution board in high end commercial or designed environments as well as in industry thanks to its sturdiness.

CVX 630 Features & Benefits

Quick & Easy Mounting

The bracket for the DIN Rail Kit is mounted on functional frame without the use of screws or tools and ensures high strength and greater mechanical stability over the time.

Simple Installation & Comfortable Maintenance

All the metal components of the distribution board ensure earthing by contact thus avoiding additional connections. All front panels are supplied with captive screws and can be fitted with hinges in order to facilitate maintenance operations after the installation of the distribution board.

Strength and Design

The fine design and the special curved glass of the door allow the installation of the distribution board in high end commercial or designed environments as well as in industry thanks to its sturdiness.

Load Management Relay - P Comfort

Code	Rated Voltage	Rated Current	Relay Contact	Contact Capacity	Modules
GWD6916	230AC	32A	1NC	16A AC1	2

The P-Comfort relay manages the power consumption of electrical systems up to 6kW. In the event of overloading, P-Comfort prevents any electricity supply interruption, disconnecting only the non-preferential loads. After a predefined time lapse, P-Comfort automatically reactivates them, avoiding any inconvenience for the user.

- In case of a downstream electrical system fault the device will retest the system every 2min and reset if possible.
- c/w Programmable Auxiliary Contact
- System with auto reset and monthly self-diagnosis of the earth leakage functions without turning off the system's power supply, using internal bypass contacts during the test
- Compatible with **GWD0953** (wifi interface) and **GW90992** (bus communication interface).

- The auxiliary contact, coupled on the right side of the ReStart device, will change state to indicate that the automatic reset did not take place because there is a fault in the electrical system
- The auxiliary contact can be set in three operating modes:
- NA (default condition), - NC, - NO as signal of handle position

- Wi-Fi interfaces (coupled on the right side of ReStart device) connected to a router, allow communication of the following information to several devices connected to the network:
- status of circuit breaker (ON/OFF)
- lack of power supply in the system due to the presence of fault
- resetting of power supply after successful automatic reclosing
- if coupled to ReStart with Autotest, details of last test operation - result, date, and time

The BUS module, by means software available on www.GEWISS.com web site allows one to:

- Monitor the status of the circuit breaker coupled with ReStart
- Control the Autotest function remotely
- Manage the automatic reclosing function remotely.
- It allows the installation of ReStart devices in monitoring systems with BUS RS485 communication protocol

Shunt Trip Release for Remote Opening of Modular Circuit Breakers

Code	Suitable for	Rated Voltage	No. Modules	Carton
GW96014	ReStart RM TOP / ReStart CM	230V	1	1/6

When the circuit breaker trips, thanks to **GW96014**, it can be reclosed remotely by means of the ReStart RM Top or the motor operated ReStart CM, even before the shunt trip release has been reclosed. ReStart RM Top and ReStart CM activate a remote reclosing of both the circuit breaker lever and the shunt trip release lever simultaneously.

IDP STANDARD EARTH LEAKAGE RELAYS (RCCBs)

Type AC

Tripping is ensured for sinusoidal & alternating currents.

Type A

Tripping is ensured for sinusoidal, alternating residual currents as well as for pulsed DC residual currents. Application: Loads with electronics, rectifiers, instruments.

Type A [IR]

Same characteristics as Type A, but with greater resistance to mains disturbances (surges) and atmospheric discharges (lightning) - 8/20µs: 3000A.

INDUSTRIAL PLUGS, SOCKETS & SOCKET OUTLETS

 **Pad-Lockable in OFF Position**

NOTE 1:
New range of **IP67** vertically interlocked socket outlets now available with built-in miniature circuit breaker, 6kA, C-Curve.

To realise an **IP68/69** rating, the two **IP69** products must be used together

MARINA DISTRIBUTION TERMINALS IP56

Brilliant for Tourist Marinas

68 Q-MC Range

With its innovative and functional design, the system solves all the needs for the provision of energy and services in ports, campsites and public areas, perfectly fitting in with the surroundings.

Based on an aluminium tubular frame, Gewiss Marina Terminals are strong and designed to withstand all the combined effects of sun and sea spray.

Many derivatives can be manufactured to incorporate energy metering and billing, fire hydrants, compressed air or fresh water supply.

Available locally in blue, white is available ex-indent.

The remote control is used to synchronise and manage the system from a single point. Every remote control can command up to two lines, with 60 lamps each. The remote control synchronises the connected lamps, forces the execution or inhibition of the tests; it also sends the Reset mode command. Compatible with GW81631, GW81632
